Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The onsite audit portion of the PREA Audit of the Snake River Juvenile Detention Center was conducted on August 26-28, 2019. Upon arriving at the facility, I had an opening meeting with Paul Shepherd, facility administrator. Nathan Lewis, facility PREA Coordinator, was not available, but he and I met at length later during the audit.

During the audit, the facility's population was 11. There were at least three staff members on duty at all times while I was present at the facility, including during the late evening interviews with staff.

A tour was conducted of the facility by Supervisor N. Nakamura. During the tour, he pointed out the numerous cameras that are deployed throughout the facility. All rooms are covered to a large degree by the cameras, cutting blindspots. The control room is located in the center of the facility, allowing fairly good line of sight into most areas anyway.

Classroom A was visited first. The room has three cameras in it, eliminating blind spots. Next, the kitchen was observed. There are two cameras viewing it. Classroom B was next. Also covered well with cameras, the education staff consists of 1 teacher and two teaching aides.

"B" wing was the first living area checked during the tour. There are 2 showers for the 10 rooms, and at the time visited, 4 beds were occupied. There is also a "trusty" closet which is closely monitored, with no juveniles being admitted into it. Use of the shower is also closely monitored, logged, and cleared after each use.

"A" wing is almost the same layout, but with 12 rooms. There were also 4 beds occupied at the time of the visit. (More residents were admitted by the end of the audit, accounting for 11 residents interviewed.)

Visitation was observed. The room is close to the control room. The staff mentioned that there is a small blind spot in the visitation room, but staff will ask the resident to adjust their position so that staff can view them at all times.

In the intake area, there are 5 holding rooms. There is a property room immediately adjacent to the intake area, and again, access to these areas by residents is prohibited.

We also viewed the sallyport, medical and mental health offices. All areas were equipped with cameras watching the rooms, or at least watching the doors leading into those rooms.

Interviews with staff went very well. All knew that the cross gender announcement had to be done multiple times per day. All knew that cross gender searches were not to be done, but training had been conducted on how to search transgender and intersex youth.

The SRJDC has done a fantastic job at training staff. Various questions were asked of staff regarding all aspects of the training topics required by PREA. Staff were well versed in all of them. Especially impressive was the fact that every single one of the staff that were given a hypothetical situation involving sexual abuse during their interview was able to recite every one of the important steps that first responders are to take immediately after receiving sexual abuse report (115.364).

Interviews with residents were also held. Every resident in the facility was interviewed. One resident that claimed LGBTI status was interviewed with the appropriate questions, and one resident who identified as being disabled was interviewed, again, with the appropriate questions from the PREA Interview Protocol. Resident interviews went very well, with all interviewees stating that they felt safe in the SRJDC. Although one or two residents stated that they had not been asked all of the questions for the intake assessment (115.341) it was determined that the questions are being asked routinely and this may have been an anomaly.

During the audit visit, Paul Shepherd was constantly available to answer questions. The PREA Coordinator was not able to be present during the entire audit, but as mentioned earlier, was available for an interview and was available to me if needed.

At the end of the visit, I had a report-out meeting and went over the findings of the audit. I found that the facility was in compliance with all standards.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The Snake River Juvenile Detention Center is a 27 bed facility that houses both male and female juveniles ranging in age from 10-17 from 6 different counties. All cells are single occupancy cells with four cells that are utilized for intakes, overflow or special management juveniles. One cell is the Observation cell which is closest to Control for our higher risk juveniles. The Observation cell is also the only cell which is dual monitored by staff and the camera system. SRJDC currently employs 20 full time staff, that run on three shifts of 7-3, 3-11 and 11-7. On the 7-3 and 3-11 shifts there are five individually assigned positions and on the 11-7 shift there are three individually assigned positions. The positions include Control, Intake, Well-beings, and 2 Wing staff depending on the current population. Each individual shift has a main focus for daily schedule and activities for the juveniles in our care. The 7-3 shift focuses on the school program (classes and physical education), transporting to and from courts and distributing both breakfast and lunch. Special programming on the 7-3 shift includes a class taught by a representative from the College of Southern Idaho to introduce juveniles to college, a Healthy Relationship class that is taught by a representative from Twin Falls Juvenile Probation and an Eating Healthy on a Budget class taught from an outside volunteer. On Saturdays Intermountain Animal Therapy visits the facility for those juveniles that are eligible to interact with the dog. The 3-11 shift focuses on other special programming and other required activities for the juveniles. They conduct physical activity, PREA education class (Sunday for new juveniles), conduct family phone calls (Monday and Friday), distribute dinner, conduct evening showers and hygiene needs, conduct book exchange and leisure time activities, and teach structured activities. Special programming on the 3-11 shift includes Church conducted by Amazing Grace Fellowship, Alcoholics

Anonymous, Dental Hygiene class and Reformers Unanimous (Thursday). The 11-7 shifts main focus is the well-being of the juveniles in our care during the sleeping hours. The 11-7 shift also conducts laundry cleaning for the juveniles and filing of daily paperwork. All three shifts deal with new intakes throughout the day. Medical staff are at the facility 3 times weekly and the Clinician is at the facility 3-4 days a week.

PREA policy states that the PREA Coordinator will conduct an unannounced round once per month, and the Supervisors shall conduct such rounds at least once per shift, meeting the requirement in this standard. Staff are also prohibited by policy from alerting others to the rounds. Logs of these checks were observed.

The staffing plan is also in compliance with the State of Idaho administrative Rules that require 1:8+1, which is more strict than the PREA ratio. The staffing plan is reviewed as required. During the audit, the facility's population was 11. There were at least three staff members on duty at all times while I was present at the facility, including during the late evening interviews with staff. This is well above the PREA requirement, and staff and residents all told me that this is normal for the facility at all times.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.

Cross Gender announcements are made routinely throughout the day. Staff and residents confirmed that they are being done at shift changes, school breaks, in the morning before school, twice during school, at meals, at rec and before bed. Since the normal status quo is males and females on each shift supervise residents all the time, this was deemed to be sufficient notification. Most residents stated that they hear the announcement multiple times. Staff stated that they do not do the announcement after bedtime as to not wake residents.

All staff knew that cross gender searches of any type are prohibited, but would be documented if done. They have been trained on conducting searches of transgender and intersex residents. All staff knew that searches of any kind that are conducted for the sole reason of determining a resident's genital status are strictly prohibited.

Isolation is rarely used at the SRJDC. If it is used for alleged sexual abuse or sexual harassment victims, perpetrators or any resident who cooperated with an investigation, it is documented, and the reasons for the isolation is included in that documentation, along with an explanation for why a less restrictive arrangement could not be found.

Although the facility's PREA policy section E does not mention that isolated juveniles are to receive daily visits from medical or mental health practitioners, the Administrative Segregation policy is very clear that they are to receive such visits. Interviews with medical and mental health staff also confirmed that the daily visits would happen. AdSeg policy also requires residents to receive required services such as education, exercise and special education. The AdSeg policy as well as the PREA policy section E1e requires the facility to document the reason why no alternative means of separation can be arranged and to clearly articulate the reason for the facility's concern for the safety of all in the facility.

No housing decisions are made strictly on the basis of any LGBTI status.

All resident shower separately.

If such disclosure is made, then the clinician would meet with the person. SRJDC is no different.

Information gathered by Medical or Mental Health practitioners is always safeguarded from disclosure. Only information that is necessary to keep residents safe would be disclosed to other staff members.

No resident in the SRJDC is over the age of 17, so informed consent is not an issue.

Instructions for Overall Compliance Determination Narrative

The narrative below must include a comprehensive discussion of all the evidence relied upon in making the compliance or non-compliance determination, the auditor's analysis and reasoning, and the auditor's conclusions. This discussion must also include corrective action recommendations where the facility does not meet the standard. The facility shall offer medical and mental health evaluation and, as appropriate, treatment to all residents who have been victimized by sexual abuse in any circumstance. This is not limited to those who have been abused in a juvenile facility or other institution.

The evaluation and treatment of such victims may include, but not be limited to, follow-up services, treatment plans, and, when necessary, referrals for continued care following their transfer to, or placement in, other facilities, or their release from custody. In many instances, treatment deemed necessary by the medical or mental health practitioner may include services provided in the community.

This would strongly facilitate follow up care outside with the provider that the resident has been working with.

The facility shall provide such victims with medical and mental health services consistent with the community level of care. Since treatment would most likely be done in the community, the level of care would be consistent with the community level of care.

Resident victims of sexually abusive vaginal penetration while incarcerated, or upon request of the resident in any case, shall be offered pregnancy tests. Also, if pregnancy test results are positive, regardless of whether the pregnancy resulted from any sexual abuse incident within the facility or any sexual contact prior to intake, such victims shall receive timely and comprehensive information about and timely access to all lawful pregnancy-related medical services.

Although resident victims of sexual abuse while incarcerated shall be offered tests for sexually transmitted infections as medically appropriate, the testing is available to other residents upon request.

Treatment services shall be provided to the victim without financial cost and regardless of whether the victim names the abuser or cooperates with any investigation arising out of the incident.
