Twin Falls, Idaho
REGULAR AUGUST MEETING
August 5, 2026, 8:00 a.m.

Chairman Reinke called the Board of County Commissioners to order at 8:00 a.m. in regular session, pursuant to the recess of August 4, 2026.

PRESENT: Commissioner Rocky Matthews, Commissioner Brent Reinke,
and Commissioner Suzanne Hawkins.

ABSENT: None.

STAFF: Deputy Clerk Shannon Carter.

The following proceedings were held to wit:

In the Matter of MEETINGS

Commissioner Hawkins met with Val Stotts, Safe House Director, for a department update. Commissioner Hawkins attended an ICRMP supervisor training.

In the Matter of COUNTY PROPERTY

Commissioners conducted a good faith meeting to address access to Centennial Park.

Commissioners met with Ray Perron, Gary Perron, Clear Springs Construction and discussed the Centennial Park Boat Ramp access.

Commissioner Reinke noted that as per the agreement signed on May 7, 2026 if the County suspends the ramp access, a good faith meeting will be held to address concerns. Bob Beer, Facilities Director, noted that a crack was found in the ramp. Mr. Beer noted that CSC stated that their diver found the crack prior to the use of the ramp. County divers found no evidence of a crack when they dove the same area prior to the ramp use. Mr. Beer noted that the ramp was not broken prior to the barge use and now is. Mr. Beer noted that the County was notified of the damage to the ramp in June and the damage is a significant danger to the public so access has been suspended for all users.

Ray Perron reviewed a PowerPoint presentation with the Board. Mr. Perron stated that the crack was preexisting and was not caused by CSC. Mr. Perron noted that further operations are safe and CSC can operate within the recommendations made by Civil Science. Mr. Perron reviewed a timeline of the project and the ramp inspection. Mr. Perron reviewed the professional diver's documentation which included documenting a void under the ramp which was similar to the County's findings of the void. Mr. Perron provided photographs of the crack which showed rounded edges and significant sediment and biological growth within the crack. Mr. Perron noted that CTS reviewed the pictures and provided an opinion via e-mail stating that the crack was older than 2 months. Mr. Perron reviewed a report from Civil Science on the data points from the previous survey. Mr. Perron disputed the crack being caused by the barge and provided a visualization showing contact on the crack by the barge was not possible.

Commissioner Matthews asked when the first survey was done, Mr. Perron noted it was on December 17, 2025. Mr. Perron reviewed the surveys done by Civil Science. Mr. Perron reviewed the letter from Civil Science and noted that the recommendations were made for recreational general public use, not for his commercial/professional use. Mr. Perron stated that CSC has a proven plan for a safe and sound operation. Commissioner Reinke asked when the photos were taken. Mr. Perron stated that the photos were taken approximately a week or two ago, after the suspension of the access. Mr. Perron requested that the Board give permission for CSC to continue their use of the ramp based upon the information that they provided. Mr. Perron discussed the future use plan and projected water level. Mr. Perron asked what CSC could do for the Board to be comfortable with their continued use of the ramp. Mr. Perron reviewed some options that they would be willing to do to ensure continued access.

Commissioner Reinke asked what the loud noise was the morning of the first load. Mr. Perron stated that they believe that the noise was the barge coming together in two pieces, not the sound of the barge hitting the ramp. Commissioner Reinke asked why Mr. Perron did not disclose the crack at the first meeting if they were aware of it. Mr. Perron stated that they did not feel that they

would impact the crack and that the County was already aware of the crack. Commissioner Reinke reviewed the incidents that have happened in the last few weeks. Mr. Perron stated that their use had no impact on those incidents. There was discussion regarding the drop off at the end of the ramp and the change in elevation of the ramp. Mr. Perron stated that they disagree with Mr. Beer's statement that the crack was not there prior to their use.

Bob Beer, Facilities Director discussed the report from Civil Science and the graph showing the elevation change. Mr. Beer reviewed pictures of the barge that were taken on the initial launch showing it bottoming out. Mr. Beer stated that the ramp was not broken before the launch and now it is broken. Mr. Beer stated that there is a serious problem at the ramp. Mr. Beer stated that he did not believe the rounded edges of the crack and the sediment were compelling evidence that the crack had been present for any length of time. Further damage will make it impossible for the public to use the ramp.

Mr. Perron disagreed that the barge bottomed out and reviewed the slide showing the barge and noted that the survey points did not change from before to after their use. Mr. Perron requested that the Board speak directly to Civil Science rather than accepting hearsay. Mr. Perron stated that the best case scenario for the Board is that CSC damaged the ramp as they have insurance for replacement. However, they will not cause further damage by continued use.

Commissioner Matthews noted that on March 8, 2026 he took a picture of the ramp and according to the USGS measurements it was the same flow on July 27, 2026. On July 27, 2026 he could see the crack. On March 8, 2026 he could not see a crack so in his opinion the crack did not exist. The Board spent four months with the Perrons and were told by the Perrons that the ramp would hold up a locomotive. Commissioner Matthews questioned that if the Perrons knew the crack was there, why did they not disclose that at the beginning. The County was unaware of a crack ever existing and now there has been a significant change in the ramp since March.

Commissioner Hawkins noted that she had difficulty giving approval in the beginning as it is the public's ramp. The Board went into the agreement with good faith and with the Perron's not disclosing their awareness of a crack. According to section 9 of the agreement, the Board has the right to terminate the agreement.

Commissioner Hawkins made a MOTION to terminate the agreement effective immediately. Commissioner Matthews SECONDED. Motion passed unanimously.

There being no further business, the Board recessed until 8:00 a.m., August 6, 2026, at the Commissioners Chambers, second floor of the Twin Falls County West Facility, 630 Addison Ave West, Ste. 2300, Twin Falls, Idaho, for the transaction of further business of the Board.
